## About MIDPARK TOWERS

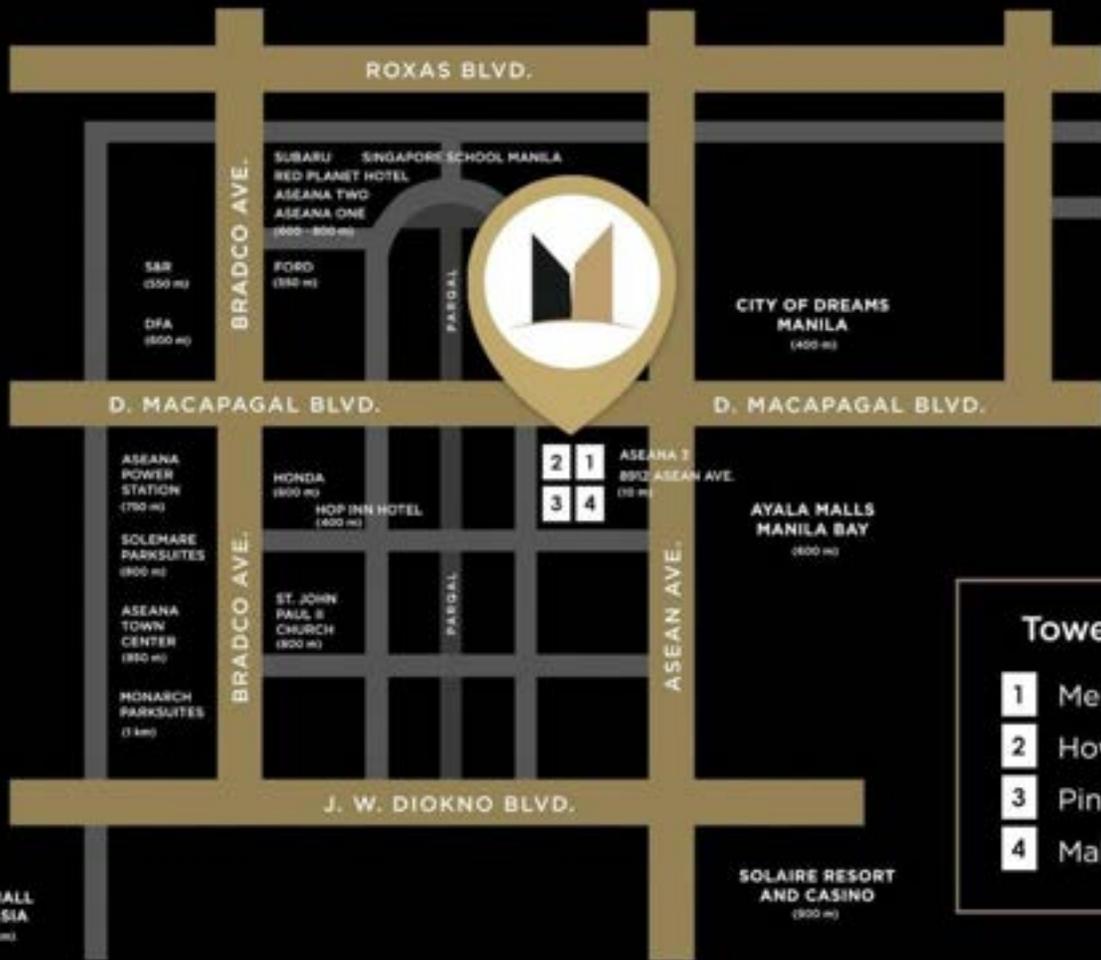

The second residential offering of **Aseana Residential Holdings Corp. (ARHC)**, the fully owned subsidiary of **D.M. Wenceslao and Associates, Inc.**, master developer of Aseana City. Remaining true to its work, live, and play concept, MidPark Towers is located just across Ayala Malls Manila Bay, the biggest Ayala Mall development to date and will be accessible via an elevated walkway. Additionally, the development is close to various office buildings and Aseana City's linear mixed-use and park development called Parqal.

Aside from its prime location, MidPark Towers also offers a modernized classic approach to its interior design. The simplicity and elegance of natural stone and wood elements will be integrated to the whole interior layout giving off an ambiance of warmth and sophistication. Customized furniture pieces playing along neutral color palettes can be found in the main lobby and amenity areas such as the library lounge and function room.

The integration of a modern classic visual and its unique functionalities are all possible with ARHC's collaboration with Asuncion Berenguer Inc., a local design firm known for its list of high-end residential clientele. MidPark Towers is composed of 669 units spread across four towers.

*Redefined Lifestyle*
